PROJECTS

I've started working as a freelancer in February of 2016. Since then I've worked on 50+ different projects. Some of my larger projects include:

zenkraft

My role as a Python API Developer for a company providing multi-carrier shipping solutions. My focus is on maintaining and improving the API and individual carrier integrations.

Newchip

Working as a Django API developer for a FinTech startup. Newchip's main focus was developing an iOS app and I was responsible for the API built on Django (DRF) running on Heroku.

Sonder

I was as a Python developer in a hospitality startup. My goal was to create an ETL process/Data Warehouse. I ended up integrating over 43 different data sources over the duration of the project.

EDUCATION

Masaryk University in Brno

Information Systems
Sep 2014 - Jan 2016

Masaryk University in Brno

Computer Systems and Data Processing
Sep 2011 - Bc. in Sep 2014
