PROJECTS

I've started working as a freelancer in February of 2016. Since then I've worked on 50+ different projects. Some of my larger projects include:

Newchip: Sep 2018 - May 2019

Working as a Django API developer for a FinTech startup. Newchip's main focus was developing an iOS app. I was responsible for the API built on Django (DRF) running on Heroku.

IntrospectData: Jul 2018 - Oct 2018

Working as a Flask developer for a Data Science startup. My responsibility here was to implement a data ingest toolset. The project was built on top of Flask, Swagger, MongoDB.

Sonder: Sep 2017 - Nov 2018

Working as a Python developer for a hospitality startup. The goal here was to create an ETL process/Data Warehouse. I ended up integrating over 80 different data sources over the duration of the project.

EDUCATION

Masaryk University in Brno

Information Systems
Sep 2014 - Jan 2016

Masaryk University in Brno

Computer Systems and Data Processing
Sep 2011 - Bc. in Sep 2014
